## New MPM 86000CEV, Coolant Electric Vehicles -37°C Ready to Use

MPM is launching the new Coolant Electric Vehicles for Kia, Hyundai and others. This coolant has low electrical conductivity and is specially designed for indirect cooling of batteries in Kia and Hyundai electric models.

Due to the special additive package, this coolant is not suitable for use in traditional cooling systems!

*In most cases, the car manufacturer prescribes an interval of 60,000km.*

Due to its conductivity, Antifreeze (86000AEV) may only be diluted with demineralized water. As of late May, this product will be linked in our product recommendation at [www.mpmoil.com](http://www.mpmoil.com)

### Specifications:

- ★ Hyundai 00232-19091 / 07100J2A20EU
- ★ KIA 07100J2A20EU / UM020-CH237
